StreamNovo

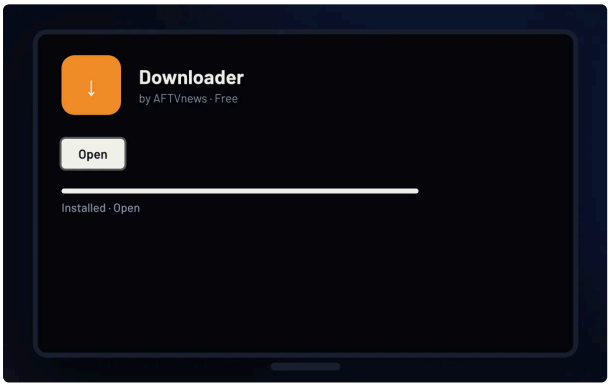

SETUP GUIDE · TIVIMATE · FIRE TV STICK

SET UP TIVIMATE ON FIRE TV STICK

5 steps · about 10 minutes

Before you start

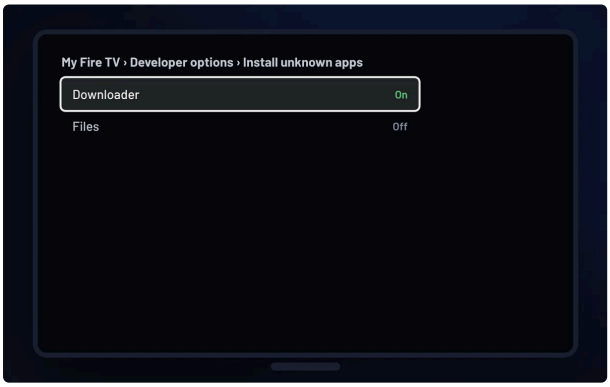

- Your StreamNovo login: **server URL, username and password**, or your M3U link
- Your Fire TV Stick, connected to the internet
- About 10 minutes

Step 1 of 5

Install Downloader

On the home screen, open **Find**, search for **Downloader** and install it. It's free.

Step 2 of 5

Allow unknown apps

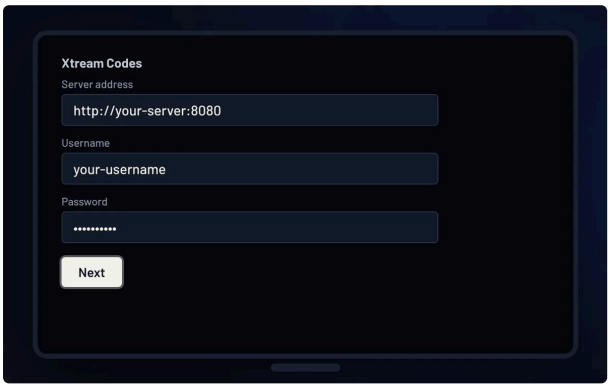

Settings › My Fire TV › About: press your device name **7 times**. Then **Developer options › Install unknown apps** and turn **Downloader** on.

Step 3 of 5

Download TiviMate

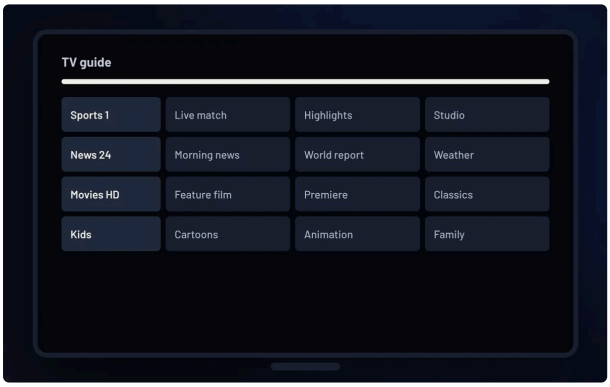

Open Downloader, type **tivimate.com** and install the app from its **official website**.

Step 4 of 5

Add your StreamNovo login

In TiviMate choose **Add playlist › Xtream Codes**, then enter the **server address, username and password** from your email.

Step 5 of 5

Start watching

Your channels and TV guide load in a minute or two.

Good to know

- Downloader is a free app from the Amazon Appstore. You only need it once.
- Your login details are in the email we sent after your order: server address, username and password.
