StreamNovo

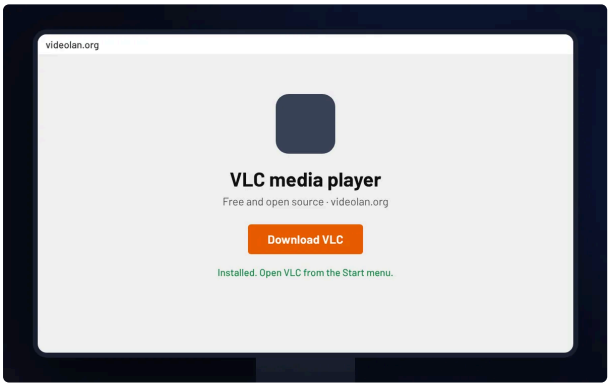

SETUP GUIDE · VLC · WINDOWS PC

WATCH STREAMNOVO WITH VLC ON WINDOWS

3 steps · about 5 minutes

Before you start

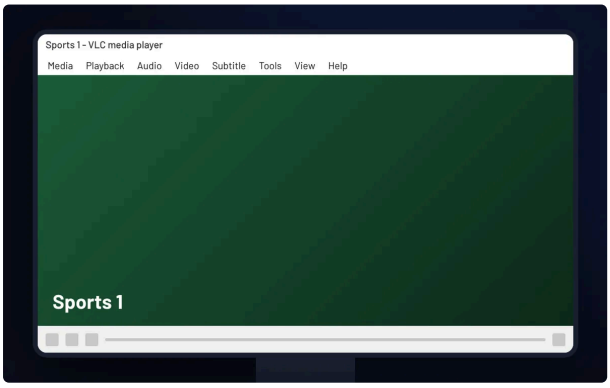

- Your **M3U link**, from your StreamNovo email
- Your Windows PC, connected to the internet
- About 5 minutes

Step 1 of 3

Install VLC

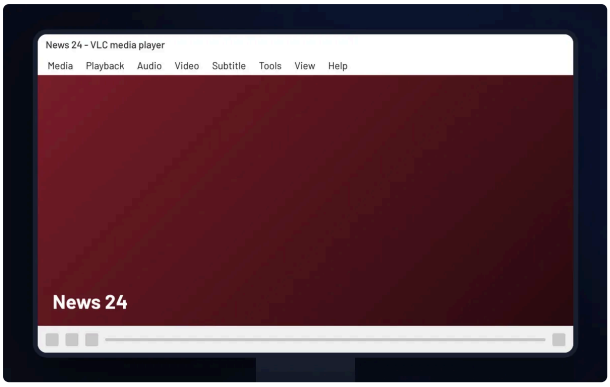

Download VLC from its official website, **videolan.org**, and install it. It's free.

Step 2 of 3

Open your StreamNovo link

In VLC, choose **Media › Open Network Stream**, paste your **M3U link** from your StreamNovo email and click **Play**.

Step 3 of 3

Pick a channel

Open **View › Playlist** to see all your channels. Save them with **Media › Save Playlist to File** to reopen them in one click.

Good to know

- VLC uses your M3U link only. It doesn't support Xtream Codes logins.
- VLC has no TV guide. For a guide with programme times, use IPTV Smarters or TiviMate on a TV device.
